📍 Raipur, India

SUMMARY

Full Stack Developer and CS undergraduate with hands-on experience building end-to-end web applications using the MERN stack, TypeScript, and REST APIs. Proficient in both frontend and backend development, with additional expertise in ML integration, data visualization, and system design. Eager to contribute to scalable, production-grade software products.

EDUCATION

International Institute of Information Technology (IIIT) Naya Raipur

Naya Raipur, India

B.Tech in Computer Science and Engineering

Aug 2023 – Jul 2027

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Databases, Linear Algebra, Probability & Statistics, Machine Learning

EXPERIENCE

Relevant Skills

Remote

Full Stack Developer Intern

2026 – Present

- Contributing to **Internarea**, a full-stack internship and job-application platform modeled on Internshala, built with TypeScript across the frontend and backend.
- Developed the **Public Space** community module, enabling users to share posts, photos, and videos with friend-based posting limits, and implemented subscription plans with **Razorpay** payment gateway integration for premium internship applications.
- Enhanced platform security by building **OTP-based authentication** and login activity tracking to detect and prevent unauthorized account access.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, Responsive Design, Data Visualization (Chart.js)

Backend: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets

Databases: MongoDB, PostgreSQL

DevOps & Tools: Git, GitHub, Linux, Docker (basics), Postman, VS Code

ML / Extras: PyTorch, Scikit-learn, LangChain, NumPy, Pandas, Streamlit

PROJECTS

Finance Management App | *Next.js, TypeScript, Python, Chart.js*

2026

- Built a full-stack personal finance tracker with a Next.js frontend, a Python backend service, and a scalable database layer, exposing RESTful APIs for expense, savings, and investment CRUD operations.
- Integrated interactive data visualizations (charts, spending trends) using Chart.js to support evidence-based financial decisions.
- Implemented ML-driven analytics on the backend to surface personalized insights on user spending patterns.

Trackerr – Full-Stack Internship Application Tracker | *Next.js, TypeScript, MongoDB, NextAuth.js*

2026

- Built a production-ready internship application tracker with Kanban and list views, secured via NextAuth Google OAuth and JWT sessions, backed by MongoDB/Mongoose data models.
- Designed an analytics dashboard with funnel and velocity charts, automated daily stale-application email reminders with Vercel Cron Jobs and the Resend API, and built CSV import/export with batch validation.
- Wrote 50+ unit and property-based tests with Vitest and fast-check to ensure data integrity and route protection.

PrepWise AI – Intelligent Study Assistant Platform | *FastAPI, React, MongoDB, ChromaDB, Gemini*

2026

- Built a full-stack AI study platform with a FastAPI/MongoDB backend and a React + Vite frontend, secured with JWT authentication.
- Implemented a RAG pipeline (PyPDF extraction, LangChain chunking, Sentence-Transformers embeddings, ChromaDB) letting students query their own notes via Gemini.
- Designed an AI quiz generator, a forgetting-curve-based smart revision engine, a multi-factor exam-readiness score, and an AI mock-viva module with real-time Gemini answer evaluation.

ACHIEVEMENTS & COMPETITIONS

StatHack – IIT Goa | *1st Place Winner*

2024

- Won first place in a hybrid ML competition involving LLM benchmarking/comparison and time-series forecasting.
- Applied advanced feature engineering, statistical modelling, and ensemble techniques to outperform competing teams.

Competitive Programming

Ongoing

- Codeforces Max Rating: **1151** CodeChef Max Rating: **1642** LeetCode: **1631 rating**, 300+ problems solved.
- Strong foundation in algorithms, data structures, and mathematical reasoning – critical for optimizing application logic.

AREAS OF INTEREST

Full Stack Web Development • System Design • API Development • ML-Integrated Applications • DevOps Fundamentals
